

Ps Barcode

Automatic parking facilities with barcode tickets

The barcode solution for managing occasional users and payments

- System for managing occasional users and season ticket holders.
- The system can be customised according to the owner's actual requirements.
- It ensures a reduction in running costs and greater system profitability.
- It enables business relationships to be established with public or private bodies.
- Top modularity and efficiency of the service offered.
- Barcode tickets on pre-cut ISO STANDARD FAN FOLD thermographic paper.

* With the heating unit active, the resistor absorbs a further 500 mA and requires a further 90 W of power

CONNECTION DIAGRAM

SYSTEM COMPONENTS

PSE3000 Entry unit

Designed to manage entry with barcode tickets, this has two buttons to request the ticket (double height) and a reader for transponder cards to manage season ticket holders. An intercom can be fitted. Made from sturdy galvanised steel with epoxy paint, secured to the ground using the anchoring base supplied.

PSU3000 Exit unit

Allows the use of barcode tickets that have been validated (at the automatic or manual pay station) to manage exiting the parking facility. Complete with reader for transponder card to manage season ticket holders. An intercom can be fitted. Made from sturdy galvanised steel with epoxy paint, secured to the ground using the anchoring base supplied.

PSC3000 Automatic payment station

Manages payment and validation of barcode tickets, complete with reader for various denominations of coin, reader for transponder cards to manage season ticket holders and thermographic paper printer for issuing receipts. Made from sturdy galvanised steel with epoxy paint, secured to the ground using the anchoring base supplied.

001PSC7001 Touch screen automatic payment station

The automatic TOUCH SCREEN pay station built using break-in resistant steel. A number of options are available to pay with coins and notes. Season ticket holders can top up their transponder card directly at the pay station.

The features

- Multilingual menu with 6 language choices.
- Coin and note reader that can be programmed according to the currency in the country of installation.
- Information during payment: amount paid - still to pay - change.
- An intercom with a HELP call button can be fitted.
- Season ticket management with transponder cards, which can be topped up directly at the automatic pay station.
- Advertising or service messages available for customers.

PSC3 Auxiliary payment station

A special unit for creating multiple validation or payment points, even without a PC. Very useful at supermarket checkouts, or anywhere a business owner wants to reward loyal customers by paying for parking in whole or in part.
